

Graphite for Powder Forging

Asbury provides the powder metallurgy industry with quality powders for alloy and sintering control. Asbury uses its expertise in processing to provide the powder forge industry with an exceptionally clean product to help eliminate the possibility of inclusions. Asbury also supplies the powder forge industry with a line of graphite based forging lubricants.

Natural Graphite

5 micron

PF 5 95.5 Carbon Min
HPPF 5 99.0 Carbon Min

9 micron

PF 9 95.5 Carbon Min
HPPF 9 99.0 Carbon Min

Synthetic Graphite

5 micron

PFS 5 99.0 Carbon Min

9 micron

PFS 9 99.0 Carbon Min

Product Data Sheets Available on Request

Graphite Based Lubricants for the Forge

Graphokote 645	25% Solids	5 micron	Natural Graphite
Graphokote 664	26.5% Solids	5 Micron	Natural Graphite

**Consistency – the key to making your powder blend.
Quality – A must for the powder forger.**

Asbury provides consistency thru raw material selection and over 100 years experience in the processing / grinding of graphite powders. This consistency in particle distribution and purity result in a more homogenous powder mix.

With a proprietary processing method, Asbury insures that there are no particles of any kind above the crucial size that promotes inclusions.

Quality = Asbury = Consistency
